Figure 1. The setup wizard «ReGen – Ace Video Recorder»

Drag icon ReGen - Ace Video Recorder in the **Application folder**. At the installation of the application is completed.

3. Activating the program

You can use ReGen - Ace Video Recorder with functional limitations for an unlimited period to lift restrictions must purchase a license key.

Functional limitations

In the case when the program was not registered, you have the ability to record the computer screen in Full screen mode, an unlimited amount of time (see figure 2).

Figure 2. Functional limitations

You can also adjust the level of the quality of the recorded video.

For extended functionality, you must register the program using a license key. To do this, click on the button "Register program" and you'll get a form to activate the program (see Figure 3).

Figure 3. Registration window

If you do not have a license key, you can purchase it on the official site. For this click on the button **"Buy"**, then open the purchase page ReGen - Ace Video Recorder. Select the appropriate version of the license. The key will be automatically sent to you by email after payment.

Once you have received the license key, enter it in the box **"Register program"** and click **"Activate"** (see figure 4).

Figure 4. Entering the license key

You will see the Activation Assistant connecting to ReGen Software activation server. When the activation has been successful, you will see Activation completed successfully Please click **"OK"**. (see figure 5).

Figure 5. Successful completion of the registration

Click **"OK"** and the program is restarted without restrictions. At this stage of the program registration is completed.

4. Screen recording

The program is able to record your computer screen, but it is also able to record some of its parts. To record the entire screen, select from the drop down list item "**Full screen**". For the recording part of the screen, select "**Custom**" (see figure 6).

Figure 6. Setting the recording area

The program also allows you to customize the output video quality, frame rate and recording microphone.

After all the settings, you must click on the button "**Start Recording**" button to start recording. To stop recording, click on the button "**Recording ...**". Video will be stored on your computer's desktop.

5. Technical support

If you are a registered user ReGen - Ace Video Recorder, you can upgrade to any newer versions for free as long as your license is valid. Simply download the latest version of ReGen - Ace Video Recorder and install it without uninstalling the previous version.
